Quiz: Calculating a p-value

$H_1 : \mu < 5$

And you collect data that provides you with a **sample mean of 10**.

QUESTION 1 OF 3

Based on the above, select the statement that is true.

We would expect the population mean to be greater than 5.

☐ We would expect the population mean to be less than 5.

☐ We have no idea where the population mean would be.

QUESTION 2 OF 3

Which of the following would be true regarding the p-value in this case.

We expect the p-value to be less than 50%.

We expect the p-value to be greater than 50%.

☐ We cannot have any idea what the p-value would be in this case.

QUESTION 3 OF 3

Based on your sample mean of 10, which hypothesis seems more likely to

The null.

☐ The alternative.

☐ We cannot know.
